PharmaClinix®
Advanced Cosmeceuticals

- **Stretch marks occur in the dermis, when the skin is pulled beyond its elastic tolerance resulting in tears of the dermis.**
- **Stretch marks are a form of scarring on the skin.**
- **Darkened stretch marks usually appear when your skin has been stretched and damaged, usually following a rapid weight loss or pregnancy.**

Stretch marks can appear anywhere on the body, particularly areas where fat is stored or areas which have a tendency to stretch e.g. Stomach, buttocks, arms, hips etc.

Stretchex® is a smooth, glossy emulsion which is easy to spread over a large area & is absorbed very quickly with no greasiness or stickiness.

An independent research was carried out by dermatologist and gynaecologist in cosmetic laboratory of **S.L.B. ITA-TEST**

After 6 weeks of regular use the following results were obtained.

73% of the people found a significant reduction in cellulite

62% of the people found a visible reduction in stretch marks

93% of the people tested found that it had a slimming effect

Pharmaclinix®

Pharmaclinix®

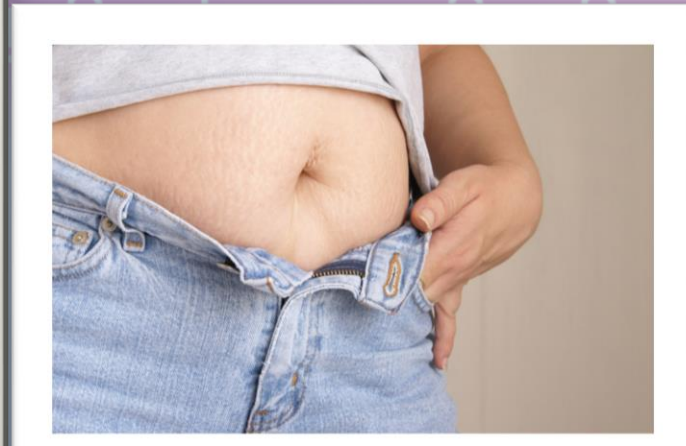

The skin appears smoother & firmer due to the reduction of cellulite, dimples & stretch marks.

- ✓ safe to use during pregnancy.
- ✓ It can be used on sensitive skin

Stretch marks appear :-

- On the breast and abdomen during pregnancy
- In growing adolescents.
- During rapid weight gain or weight loss
- During body building

Pharmaclinix®

Pharmaclinix®

How does
Stretchex® work?

PharmaClinix®
Advanced Cosmeceuticals

Stretchex® increases the Production of Collagen which

- ❖ Increases the skin's elasticity
- ❖ Avoids new stretch mark scarring.
- ❖ Increases fat metabolism, leaving a more contoured body
- ❖ Prevents discolouration of the skin
- ❖ Repairs damaged & stressed tissue
- ❖ Improves blood flow, which remove toxins, fat & excess fluids

- ❖ Permanent Dramatic Reduction of Deep Furrows and Discoloration
- ❖ Effective on New or Existing Stretch Marks on light or dark skin

You can prevent stretch marks by using Stretchex® cream prior to starting a bodybuilding regimen or early in pregnancy.

Studies have shown that women who used a stretch mark cream daily were able to significantly prevent stretch marks during pregnancy.

Pharmaclinix®

Pharmaclinix®

Science behind
Stretch Marks

- High concentration and effective combination of ingredients incorporated in Stretchex® give the skin optimum nutrients for skin repair.

PharmaClinix®
Advanced Cosmeceuticals
